MAP OF CHILE BY REGIONS

GENERAL BACKGROUND (A)

LOCATION AND EXTENSION:

Chile is located in the southwest of South America stretching as far south in Antarctica as to the very South Pole and with its western most province, Easter Island, in the South Pacific, Oceania.

On the American continent, Chile stretches from parallel 17°30' S. at the northern boundary to parallel 56°32' S. at the southern-most tip of South America.

The Chilean Antarctic Territory comprises the whole of the area located between meridians 53° and 90° W. as far as the South Pole at 90° S.

The national territory comprises several islands in the Pacific Ocean, which add to the country's territorial waters. The nearest to the continent are the islands that form the Juan Fernández archipelago, San Félix and San Ambrosio. The most distant from mainland are Sala y Gómez and Easter Island or Rapa Nui.

The latter is located at 27° S. and 109°30' W., opposite the port of Caldera and 3,760 kilometers away from mainland.

From the Concordia Line to the South Pole, the country is over 8,000 kilometers long. The area of South American, Antarctic and Oceanic Chile is 2,006,626 square kilometers, with 756,626 sq. km. corresponding to South American and insular Chile and 1,250,000 sq. km. to the Chilean Antarctic Territory.

SOUTH AMERICAN AND INSULAR CHILE	756,626 sq. km.
Cropland	16,560 sq. km.
Grazing land	129,300 sq. km.
Forest land	84,200 sq. km.
Non-productive land	526,566 sq. km.
CHILEAN ANTARCTIC TERRITORY	1,250,000 sq. km.
TOTAL	2,006,626 sq. km.

BOUNDARIES:

Chile is bounded on the north by Perú, by a border line known as "Línea de la Concordia"; on the east by Bolivia and Argentina, mainly by a line that runs through the highest summits of the Andes; on the south by the South Pole, and on the west by the Pacific Ocean, including 200 nautical miles of territorial waters.

CLIMATE AND NATURAL RESOURCES:

The North:

Climate: Desert.

Natural resources: Nitrate, copper, iron, lithium and other minerals, valleys suited for agriculture, sea foods.

The Center:

Climate: Mild and temperate, with rains in winter.

Natural resources: Agricultural and grazing lands, forests, hydroelectric power (rivers), copper, coal, sea foods.

The South:

Climate: Temperate and rainy.

Natural resources: Agricultural and grazing lands, forests, hydroelectric power (rivers), copper, coal, sea foods.

The Far South:

Climate: Cold steppe.

Natural resources: Forests, petroleum, natural gas, coal, limestone, sheep, sea foods.

TEMPERATURE, RAINFALL AND ENVIRONMENTAL POLLUTION: (A) (B) (C)

POPULATION

GENERAL BACKGROUND:

According to different censuses, Chile had 1,010,332 inhabitants in 1835 and 2,687,985 inhabitants in 1895. In 1907, there were 3,220,531 inhabitants, amount that rose to 5,023,539 in 1940 and to 7,374,115 in 1960.

The census carried out in 1970, showed a figure of 8,884,768 inhabitants and the latest census, of April 1982, registered 11,329,736 people.

At present, according to projections made by the National Bureau of Statistics, the population in 1991 is of 13,385,817 persons.

This sustained growth can be mainly attributed to the persistence, until 1962 of moderately high birth rates (37.5 ‰ as an average) and to the decline of the mortality rate, which resulted in an increase of the average Chilean life expectancy from a level of 67.2 years in 1975 to 70.2 years in 1979 and 72.0 years in the 1990-95 period.

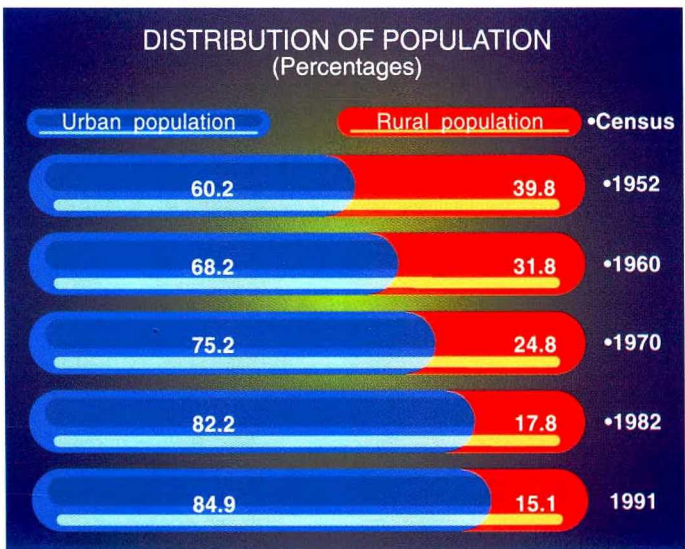

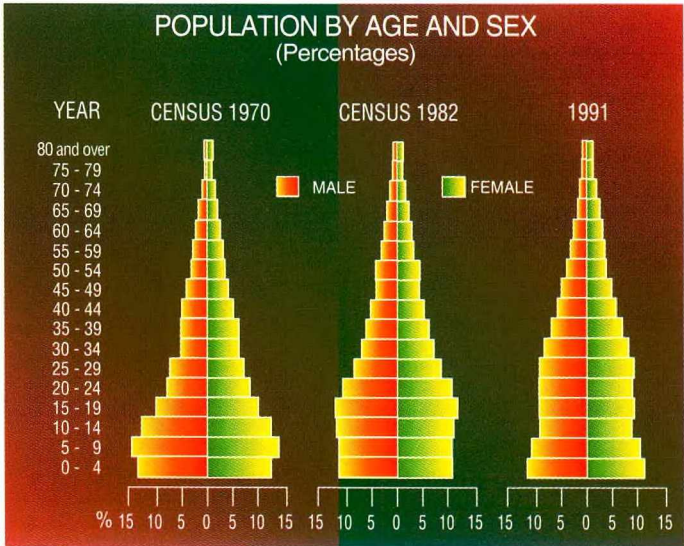

In recent years, the Chilean population has been undergoing a slow process of aging due to a rapid drop in fertility rate. At present, the birth rate fluctuates around 2.2% per year and the general mortality rate at 0.6%, with a net growth of 1.7% per year.

Rural population predominated up to 1930. In 1875, it represented 65.1% and in 1920 53.6%. Since the 1940 census, this situation was reversed; the 1982 census showed that the rural population accounted for 17.8% of the total population. Estimated figures for 1991 point out that the rural population is only 15.1% of the total.

At present, Chile has a population density of 17 inhabitants per square kilometer, which is one of the lowest figures in Latin America. This is due to the fact that over 70% of its South American territory is desert, mountainous or has some other type of severe constraint for human settlement.

GOVERNMENT SYSTEM: POLITICAL AND ADMINISTRATIVE ORGANIZATION

According to the Political Constitution of 1980, Chile is a unitarian state. For administrative and interior government purposes, the country is organized into regions, and these, are divided into provinces. For the purpose of local administration, the provinces are subdivided into communes.

The regional, provincial and communal government systems are hierarchically structured. At the head of each region's administration is the Intendant, who is in charge of directing and administering the region, and is advised by a Regional Council of Development and a Regional Secretariat of Coordination and Planning.

The Governor is subordinated to the Regional Intendant and is his representative in charge of the government and administration of each province. He is assisted by an Advisory Technical Committee and by a Provincial Council.

In charge of the communal management is the Mayor, assisted by a Communal Council of Development and by a Communal Secretariat of Coordination and Planning.

The base of the system is the commune, since it is there that the organized participation of the community takes place. Within the system, the Ministries act in a decentralized way through the Regional Ministerial Secretariats.

THE REGIONS AND THEIR CAPITALS

Decree Law 575 (July 10, 1974), divided the Chilean territory into thirteen regions:

NAME	CAPITAL
I Region of Tarapacá	Iquique
II Region of Antofagasta	Antofagasta
III Region of Atacama	Copiapó
IV Region of Coquimbo	La Serena

	NAME	CAPITAL
V	Region of Valparaíso	Valparaíso
VI	Region of Libertador General Bernardo O'Higgins	Rancagua
VII	Region of Maule	Talca
VIII	Region of Biobío	Concepción
IX	Region of La Araucanía	Temuco
X	Region of Los Lagos	Puerto Montt
XI	Region Aisén del General Carlos Ibáñez del Campo	Coihaique
XII	Region of Magallanes y de La Antártida Chilena	Punta Arenas
	Santiago Metropolitan Region	Santiago

Regions with largest population:

Santiago Metropolitan Region	5,342,913 inhabitants
V Region of Valparaíso	1,415,567 inhabitants
VIII Region of Biobío	1,692,399 inhabitants

NOTES

- (1) Average rainfall of a 30 consecutive years period (1931-1960)
- (2) 1986 and 1987 figures correspond to data collected from April through December and from January through June respectively.
- (3) Figures estimated as at June 30, of each year.
- (4) Life expectancy is defined as the number of years that a given newborn generation will probably live.
Life expectancy at one year is defined as the number of years the members of a generation who already are one year old will probably live.
- (5) All addresses correspond to Santiago unless otherwise stated.
- (6) Including Financial Sector, Home Ownership, Public Administration, Education, Health, Other Services, Cost Imputed to Banking Services and Import Duties.
- (7) Agricultural year is understood to mean the period elapsed since sowing is made in year "n-1" until harvest takes place in year "n".
- (8) It corresponds to total area planted with some selected species.
- (9) Including the production of dried, salty and smoked fish and shellfish, agar-agar and colagar.
- (10) Including cements, concentrates, slags and ores.
- (11) Including regular and premium gasoline.
- (12) Including domestic and aviation kerosene.
- (13) It refers to a group of dwellings of 73 one-storey housings of 69.8 sq. meters each.
- (14) The information on Private Sector corresponds to approved construction permits. The information on Public Sector refers to started construction.
- (15) Including common gas, blast-furnace gas and natural gas, and, since 1989, methanol and biogas.
- (16) Since 1988, The Southern Railways Division discontinued its passenger service, which was takenover by the management of VIA SUR and MERVAL Branches.
- (17) Including private cars, station wagons and taxis.
- (18) Including pickup trucks, trucks and vans.
- (19) Including motor-scooters, motor-cycles, tractors and ambulances.
- (20) Including letters, printed matter and parcels.
- (21) Since 1989 figures on occupied beds are not comparable with previous years due to changes in the computing procedures.
- (22) December to December change .
- (23) Statistical data from sales and purchases subject to Value Added Tax (VAT).
- (24) The deflator used is the Wholesale Price Index of USA.
- (25) CIF Mean Annual Price of Import according to the referenced origin.
- (26) Information related to banks under dissolution is excluded.
- (27) Interest rates of indexed transactions correspond to the geometrical average of the annual rates for each period, and the non-indexed ones refer to the cumulative value of the monthly rates for each year.
- (28) The modified display considers imports at their FOB value, thus implying to change the figures on non-financial services. It considers as reserves, only those of the Central Bank. Therefore, short-term capital flows of the banking system are not recorded as variation of reserves, but as "other capital, banking sector". The figure on holdings of international reserves considers gold value on

the basis of its market price. This modified procedure makes a distinction between the change in holdings of reserves, and the change in reserves due to balance of payments transactions. Therefore, the change in holdings is adjusted, when necessary, by: monetization or demonetization of gold, allocation or payment of SDR's, and valuation changes.

- (29) Year 1988 includes 398 million dollars as outstanding accrued interests, due to the retiming for interest payments. The counterpart is assigned as "Other Capital" (US\$ 246 million in Public Sector, US\$ 13 million in Private Sector and US\$ 139 million in the Banking System).
- (30) The State Bank of Chile (Banco del Estado) is not included here, because of its inclusion in the Banking System.
- (31) Including capital flows of development banks.
- (32) In accordance with stipulations of the International Monetary Fund Handbook on Balance of Payments, exports must be registered at the time the ownership change takes place, instead of, when passing through the Customs. Data on exports shipments, here provided for, correspond to the latter procedure. Consequently in order to approximately arrive to said Handbook's definition, several adjustment procedures are carried out, of which the most important one is the replacement of copper and molybdenum shipments for their sales abroad. Data on registered imports are gathered from importers' declarations legally recorded by the National Customs Service. Hence those imports not subject to a Customs' statement (e.g. postal remittances, simplified procedures, legal exceptions, duty free areas) are not included, but they do conform to the balance of payments concept of import. In addition crude-oil Customs' statements are replaced by purchases abroad of the National Petroleum Company (ENAP). Since 1989 export and import figures are not comparable with those of previous years due to the adoption of a new sectoral classification and codification of goods, the Harmonized System instead of the former NAB Code.
- (33) Indexes from 1987 through 1990 are in line with those of 1991 (base 1990=100), which in turn, conform to the International Standard Industrial Classification (ISIC) and to the Harmonized System for the allotment and codification of goods, adopted instead of the former NAB Code. The above should be taken into account when carrying out annual comparisons.
- (34) Figures corresponding to the new International Standard Industrial Classification (ISIC) are only available since 1988.
- (35) Applications in force authorized by the Chilean State for each year, according to Decree Law 600 of October 1974, Decree Law 1,748 of March 1977 and the amendments introduced by Laws 18,065; 18,474; 18,682; 18,840 and 18,904, published in the Official Gazette of December 10, 1981; November 30, 1985; December 31, 1987; October 10, 1989 and January 25, 1990, respectively.
- (36) Figures corresponding to the quarterly moving average of each year.
- (37) Including scientific-humanistic and technical-professional education.
- (38) It corresponds to daily average of programmed meals. Including municipal contracts.
- (39) It corresponds to the school-food programme for Primary Schools which comprises children from 6 to 14 years of age.
- (40) It corresponds to the School-Children Homes Programme, consisting of 4 meals a day.
- (*) Provisional figures.
(n.d.) No data available.

SYMBOLS

- C : Currency in circulation.
- C_1 : Banking current accounts of the non-financial private sector.
- Float : Documents of other banks received in deposits.
- D_1 : Banking current accounts of the non-financial private sector net of float ($D_1 - \text{float}$).
- D_v : Other demand deposits of the non-financial private sector, not included in current accounts.

Ahv	:	Demand savings deposits in the financial system.
Dp	:	Time deposits of the private sector.
Ahp	:	Time savings deposits in the financial system including those for housing.
D2	:	Total financial quasi-money (public and private).
D2p	:	Private financial quasi-money.
Dg	:	Public sector demand deposits net of float of the Treasury Banking Account.
E	:	Monetary base.
M1	:	Private sector money (C + D1).
M1A	:	$M1 + Dv + Ahv$.
M2	:	$M1 + Dp$.
M2A	:	$M1A + Dp$.
M3	:	$M1 + D2p$.
M3A	:	$M1 + Dg + D2$.
M4	:	M3 + Instruments of the Central Bank of Chile held by the non-financial private sector.
M5	:	M4 + Treasury promissory notes held by the non-financial private sector.
M6	:	M5 + Credit bills held by the non-financial private sector.
M7	:	M6 + Deposits in foreign currency of the private sector.
